React

Dear Sir.

I have read the job description and got very interested in working on this project as it perfectly fits in my skill stack.

Please check out my recent React projects to get a rough idea of my relevant skills.

<http://sellercrowd.com> (Django and react and D3.js and Backbone.js)
<http://www.vuhaus.com>

I am a senior full stack javascript developer with 8+ years experience.

Particularly, I am talented at ReactJS/AngularJS framework and pretty familiar with several ReactJS application architectures such as Flux, Reflux, Redux, and so on.

I am also quite proficient in JSX, ES6/7/2015, Immutable, Babel, Material UI, Semantic UI, Isomorphic Rendering, Browserify, Webpack, etc. Moreover, as a dedicated front-end developer, I have full stack knowledge & experience in html5, css3(less/sass), coffeescript, bootstrap, jquery, emberjs, backbonejs, and many other js dependency management and testing tools like grunt, gulp, bower, yeoman, jasmine, mocha, karma.

I can also cover backend successfully as well using nodejs/expressjs, ROR, or django with strong background in a variety of database platforms such as mysql, postgresql, mongodb, elastic search. AWS, Heroku, CI/CD(Jenkins, Travis CI, etc), LAMP stack, and some other DevOps also form a big part of my core skill set.

I am a GIT and JIRA expert with good collaboration experience and working styles.

I keep a strict eye on pixel perfectionism of UI/UX design, and always stick to result-driven working manner with great attention to detail, periodic thorough code review, and critical thinking.

The best quality, accurate timeline, free and polite after-service are what I guarantee to my clients.

I can start the work right now!!

Sincerely

Website to app

Dear sir.

There are several options how web site can be converted into mobile app:

- If your site is just a simple HTML content, then it is converted very quickly just depends on the content which may need to adjusted
- If your site has some coded logic on any programming language and/or databased on backend then I need to check it first before saying how easy it is.

I have a project, which was fully HTML with a lot of videos and image galleries, it is must be converted into iOS app. Because of amount of videos, I utilize CDN to increase loading performance.

I am specialist in iOS, Android app and responsive web sites. Many people ask to convert their web sites into mobile.

For the last 3 years I have converted one e-commerce web site and tens of different web sites with registration, intranet functionality and with surveys and polls.

I know how to make mobile app looks exactly beautiful as it was on web, including all responsive features.

Some of my clients I offering additional things to their app like: work offline with a content, push notifications, customizations, monetization of app and social media integration.

I am reliable and stay online as much as need to discuss/answer all questions. I like programming and always do the best.

Looking forward to hear from you.

I can look at you web site and estimate the work.

Thank you for opportunity and have a nice day

Node.js

Dear sir.

I am excellent MEAN stack developer, I think your job is very suitable for me.

I am a full stack developer extensively working on backend and frontend development.

I have worked with node, angular, express, mongodb for 4 years long.

I have been extensively using AngularJS as frontend layer.

Familiarity with server side javascript (node.js) and related tools Grunt, Gulp.

I design custom views with bootstrap (twitter and angular-bootstrap).

I have also developed custom directives and filters using node.js backend API.

Also I have been extensively using SlickGrid or Angular UI Grid .

I follow all the best practices and we have expertise over advanced AngularJS concepts like Reusable Directives, Custom Components, Interceptors, Factories, Services.

You can check my result using node.js.

Phase 2 : Android Optimizer

To build an optimizer application that will boost the performance of an Android phone. The booster will have the element of:-

► DEVICE COOLER

Cool off your device by finding and stopping the apps that are causing it to overheat.

► JUNK FILE CLEANING

Delete cache and residual files to reclaim storage, boost speed and improve the performance of your device and SD card. Keep your privacy safe by scrubbing personal info from your device.

► MEMORY BOOST

Boost your games and apps, free up memory (RAM) and speed up your device. Our 1 Tap Boost and Game Boost features make it easy to optimize directly from your homescreen.

► CPU BOOST

Calculate how much CPU is being used by apps on your device. Stop apps from wasting battery, slowing down your device and overheating.

► APP MANAGER

Uninstall unwanted apps or bloatware and back up important ones. Some rooted devices will be able to move apps to the SD card as well as uninstall pre-installed and system apps. Our own Picks section lets you find useful apps that match your interests.

► CALL AND TEXT FILTER

► LOCK, LOCATE AND WIPE DEVICES

Uninstall unwanted apps or bloatware and back up important ones. Some rooted devices will be able to move apps to the SD card as well as uninstall pre-installed and system apps. Our own Picks section lets you find useful apps that match your interests.

To Do:

Setup bitcoind correctly

Setup website config files correctly

Bid:

Hello! I've read your requirement carefully and I know you want to look for php expert. I've experience developing projects with react, nodeJS, CI, PHP... and also I've developed wallet site with blockchain. If you want me I'll finish your project perfectly. Thanks, Regard.

😊 *skill required: PHP, Graphic Design, MySQL, HTML, Blockchain*

requirement:

We need a smart contract deployment for a ERC20 - a very standard setup as per this webpage.

<https://medium.com/coinmonks/create-your-own-cryptocurrency-in-ethereum-blockchain-40865db8a29f>

We may need a php front end to interact with the smart contract as well - but this can be discussed at a follow-up stage

Bid:

Hi, I am glad to bid you.

I am a Blockchain expert.

For the last several years I have been developing Blockchain, Decentralized Exchanges, Crypto Coins based on ERC20, Bitcoin Core, X11, IOTA, Dash, Mining Pools, Block Explorers, trading platforms, Wallets, Daemons. I have expertise in ICO Token Sale, Crowd-Sale, Pre-ICO, Post-ICO,

Lending System, Affiliate/MLM, referral program, Staking, White Paper creation, smart contract, etc. My Skills are PHP, C++, Python, NodeJS, AngularJS, Ruby on Rails with 5 Years of working experience.

I am expecting a sort of conversation with you so we can discuss more in the project.

Kindly initiate a chat to discuss more on project details, budget, and timeline

I look forward to working on this.

Best Regards.

Bid:

Hi, I've seen your requirement. The last bot that I built was for Binance(this app working with <https://www.binance.com/>) Also I've built bot for various trading site(<https://www.bitmart.com/>, <https://www.gate.io/>, <https://www.huobi.com/>) I can build app or webapp whatever you want. The most important thing is to research the market price in real time to catch the best selling and buying moment. Your project can be build with Python-Pyqt5-Websocket(or API) or Django-Celery-API. To complete your project I need to use RestfulAPI or websocket and celery work and etc. I have huge experience in Trading. I'm ready whenever you are. Thanks.

😊 ***skill required: Defi***

Hello. How are you?

As a senior blockchain developer, I have much experiences with defi dapp like uniswap and pancakeswap.

I am very familiar with farming, stacking, referral and vaults and wallet connection with metamask, binance wallet, wallet connect and trust wallet.

I have some questions about your project.

-Do you want to just swap and lp?

-Do you want farming site based on masterchef smart contract?

-Do you have your own design?

-Do you have your own tokenomics for the reward token?

I can start right now and finish within 2 weeks.

Hope to discuss in detail.

Thanks

Hello. I am an experienced blockchain developer and a Full-Stack web developer.

I have worked on various blockchain projects including tokens, exchanges, NFT marketplaces, and wallets using the latest methodologies and technologies of that time such as developing the frontend of a wallet using React.js/Redux and backend APIs in Golang/Python.

I have collectively shared my past work below. Just a heads-up, most of the projects are on testnet because some projects are under testing, and some can't be shared here yet until their launch as we're under NDA.

Other than that, you will be provided with well-documented code using the latest methodologies.

Looking forward to working with you.

Hi,

I am a senior software engineer with 10 years of experience in Web, Mobile and blockchain development.

Especially I have 4 years of experience and excellent skills in developing smart contracts(ERC20, ERC721, ERC1155, ...) using solidity.

So I am professional in solidity, web3.js, opensea, IPFS, metamask.

And I am familiar with web back-end and front-end to develop dApp and marketplace.

Recently, I have completed 3 NFT projects add one is exactly same as this project.

1. Develop NFT smart contract, bulk mint 10k NFTs by owner first and publish on Opensea

2. Develop NFT smart contract, publish on OpenSea, build a website and allow people to mint their NFTs generated by random traits.

3. Develop NFT smart contract and its marketplace where users can buy or sell their NFTs for fixed price or bidding.

Images and metadata is uploaded on IPFS.

I am ready to start immediately and have confidence to complete this project successfully.

I am looking forward to working with you.

Thanks

😊 ***skill required: NFT mint - 2***

Hi

Over the past 4 years, I have specialized in blockchain development and writing fully functional smart contracts, and my experience in developing and designing NFTs spans over 3 years.

Using my solid experience, I will be able to write smart contracts and ensure predefined conditions are met without compromising on the integrity of the contract and creating NFTs.

I have worked on numerous NFT projects and here I am sharing one of my recent projects:

<https://polarbearsnft.com/>

<https://super.one/>

<https://galacticgeckos.app/>

<https://zrocor.com/>

Before we proceed, I would like to learn more about your requirements. If you could please share the project specifications along with the art works, I can better understand and explain how I would approach the project.

I have strong expertise in Blockchain, Smart Contracts, Solidity, Ethereum, Cryptocurrency, Node.js, Ethereum, Binance Smart Chain, Hyperledger Fabric.

Rest my experience, knowledge, and skills are highly suitable for this project and I would welcome the opportunity to interview me on my skills.

Looking forward to speaking with you soon.
